

EAST FORK OF VIRGIN RIVER DISTRIBUTION SYSTEM

1960 ASSESSMENT

\$ 425.00

FORWARD: The water user's of this system requested distribution supervision of the State Engineer after many years of self distribution. The first annual Meeting with the State Engineer was held February 10, 1960 and since such water users had no "acre-feet" delivery records it was unanimously agreed that the yearly assessment would be on a pro-rata share of acreage of ground owned by each listed water user with such information to be furnished by the Secretary of the water users to the State Engineer.

BASIS OF ASSESSMENT

It is determined that the amount of acreage of ground is 1,221.40.

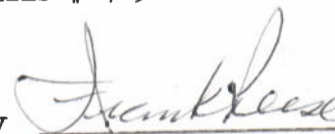

CALCULATION OF ASSESSMENT

\$ 425.00 divided by 1,221.40 acres of ground equals \$ 0.3479613559 cost of one pro-rata acre of ground multiplied by the listed number of such acreage each such water user will pay as his/her pro-rata share of the 1960 assessment.

PROOF

\$ 0.3479613559 times 1,221.40 A/G equals \$ 425.00
